YOUR **TECHNOLOGY**
SHOULD JUST
WORK. **EVERY TIME.**

Today, your home or business relies on more connected devices than ever: Wi-Fi, security, streaming, automation, video calls, and more.

But here's the reality: Most performance issues aren't caused by the devices themselves. They're caused by the network behind them.

AND WHEN THE NETWORK ISN'T DESIGNED CORRECTLY, YOU FEEL IT:

- Slow or inconsistent Wi-Fi
- Dropped video calls or buffering
- Smart home devices that “randomly” stop working
- Security risks you can't see
- Constant troubleshooting and frustration

THAT'S WHERE **WHYREBOOT** COMES IN

Your integrator has partnered with WhyReboot as an extension of their team to ensure one thing:

***Everything works the way it should:
seamlessly, securely, and consistently.
Behind the scenes, WhyReboot designs
and supports the network that powers
your entire system.***

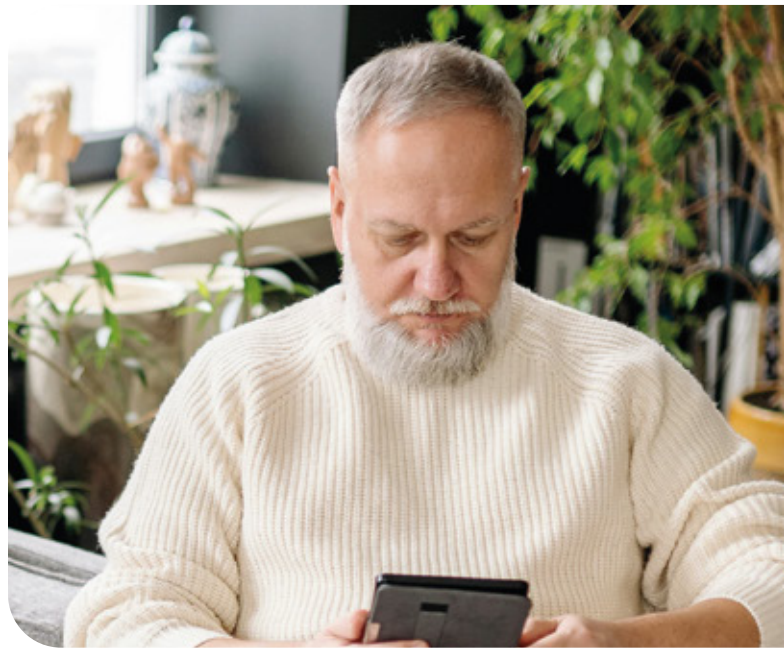

WHAT THIS MEANS FOR YOU

A Seamless Experience. Everything connects and performs the way you expect. And if something ever doesn't, your integrator has direct access to 24/7/365 support from senior network engineers to resolve it remotely and quickly.

Faster, More Reliable Performance. Your network is designed specifically for your environment, not a one-size-fits-all setup.

Stronger Security. Your system is built with enterprise-grade protection to keep your data, devices, and access secure.

Not Just Installed. Engineered. Your network is built to enterprise-grade standards, ensuring long-term reliability, scalability, and a better overall experience.

UNLIKE STANDARD SETUPS, YOUR NETWORK IS:

- Carefully designed before installation
- Fully documented for long-term support
- Built using proven best practices

A NETWORK YOU DON'T HAVE TO THINK ABOUT

Your integrator remains your main point of contact but behind them is a dedicated network engineering team working to support your system.

HERE'S WHAT THAT LOOKS LIKE FOR YOU

Remote Support & Visibility
Complete System Documentation
Ongoing Optimization

WITH WHYREBOOT SUPPORTING YOUR INTEGRATOR, YOU GET:

A seamless experience
Enterprise-grade reliability
Greater peace of mind

THE FACTS BEHIND OUR EXPERTISE

- **Industry-Leading Network Design**

We are the only company in the world who has worked with the Wi-Fi Alliance to certify homes using predictive modeling. This is the same methodology we use to design your network for full coverage and optimal performance.

- **Recognized Education & Expertise**

Our team has written and taught the majority of advanced networking courses for CEDIA, the leading trade organization for the home technology industry.

- **Built on Strong Partnerships**

We work closely with top networking and smart home manufacturers to ensure everything in your system works together seamlessly, reliably, and as intended.
