

THE NETWORK BEHIND YOUR BUSINESS

ENTERPRISE-GRADE
NETWORKING FOR MODERN
BUSINESS OPERATIONS

WHAT THIS LOOKS LIKE FOR YOUR BUSINESS:

Predictive Wireless Design

Free predictive modeling and wireless planning help ensure proper coverage, reduce interference, and optimize performance before installation even begins.

Enterprise-Grade Security

Powered by Fortinet, an industry leader in cybersecurity and firewall protection, your network is built with advanced security, segmentation, secure remote access, and proactive threat protection designed to help keep your business, devices, and data secure.

Pro-Active Monitoring & Rapid Response

Beyond simple alerts. When issues are detected, tickets are automatically created and escalated directly to engineers for real-time review, helping resolve problems before they impact operations, users, or productivity.

Faster Troubleshooting & Support

24/7/365 access for your integrator to U.S.-based senior network engineers with remote visibility into your environment for faster issue resolution.

Next Business Day Hardware Replacement

Advanced replacement for indoor network hardware under contract helps minimize downtime and keep your operations running smoothly.

Ready for Growth

Scalable infrastructure designed to support evolving technology, additional users, and future expansion.

A network you don't have to think about

Your integrator remains your main point of contact but behind them is a dedicated network engineering team working to support your system.

TECHNOLOGY SHOULD SUPPORT YOUR BUSINESS, NOT SLOW IT DOWN

WhyReboot designs, configures, and supports enterprise-grade networks built specifically for real-world commercial environments.

We help businesses and integration partners create reliable, secure, scalable infrastructure that simply works, consistently, securely, and without unnecessary complexity.

BUILT FOR REAL-WORLD BUSINESS ENVIRONMENTS

RESTAURANTS & HOSPITALITY

Stable POS systems, guest Wi-Fi, reservations, streaming, and operational uptime during peak business hours.

HEALTHCARE & PROFESSIONAL SERVICES

Secure connectivity, reliable communications, remote access, and dependable infrastructure for critical operations.

CORPORATE & OFFICE SPACES

Reliable conferencing, cloud applications, VoIP, hybrid work environments, and secure employee connectivity designed to support productivity, collaboration, and uninterrupted day-to-day operations.

WAREHOUSE & INDUSTRIAL ENVIRONMENTS

Consistent wireless coverage, operational continuity, mobility support, and scalable infrastructure across large facilities.

RETAIL & CUSTOMER-FACING SPACES

Reliable payment systems, inventory platforms, guest access, surveillance, and seamless customer experiences.

THE FACTS BEHIND OUR EXPERTISE

Industry-Leading Network Design

We are the only company in the world who has worked with the Wi-Fi Alliance to certify buildings using predictive modeling. This is the same methodology we use to design your network for full coverage and optimal performance.

Recognized Education & Expertise

Our team has written and taught the majority of advanced networking courses for leading industry trade organizations.

Built on Strong Partnerships

We work closely with leading networking and technology manufacturers to ensure your systems operate seamlessly, reliably, and securely together.

ENGINEERED NETWORKS. IMMEDIATE SUPPORT.

EXPERIENCE THE DIFFERENCE
